

Customer Churn & Retention Report

Telco subscription analytics — insights for product, growth & retention teams

Total Customers	7,032	Avg. Tenure	32.4 mo
Churn Rate	26.6%	Avg. Tenure (Churned)	18.0 mo
Retention Rate	73.4%	Avg. Tenure (Retained)	37.7 mo
ARPU (Monthly)	\$64.80	MRR at Risk (Lost)	\$139,131

Executive Summary

Out of **7,032** customers, **26.6%** have churned, representing roughly **\$139,131** in lost monthly recurring revenue. Churn is concentrated in the first year of tenure, on month-to-month contracts, with fiber-optic internet, and among customers paying via electronic check. Customers who subscribe to support add-ons (Tech Support, Online Security) churn at roughly one-third the rate of those without — the single largest controllable retention lever.

Overall Churn vs Retention

Insight: Month-to-month customers churn at 43% vs only 3% for two-year contracts. Longer commitments are the strongest retention signal.

Tenure & Customer Lifetime

Customers in their first 6 months churn at **53%**, dropping to **10%** after 4+ years. The first year is the critical retention window — churners stay an average of 18 months vs 38 months for retained customers.

Service & Pricing Drivers

Fiber-optic customers churn at **42%** — nearly 3x DSL (19%) and 6x customers with no internet (7%). This suggests pricing, reliability, or expectations issues with the fiber product.

Churned customers pay **\$74.44** on average vs **\$61.31** for retained — high-bill customers are more flight-risk.

Payment Method

Electronic-check users churn at **45%**, more than double automatic payment methods (~15%). Manual payments correlate with weaker commitment.

Add-on Services — The Retention Lever

Customers with Tech Support or Online Security churn at roughly **15%**, vs **~42%** for those without. Bundling support services is the highest-impact, lowest-friction retention intervention.

#	Action	Rationale
1	Push annual contracts	Offer discounts to convert month-to-month users; targets the highest-churn cohort (43%).
2	Onboarding for first 6 months	Build a 90-day success program — first-year churn is ~48%.
3	Bundle support add-ons	Free or discounted Tech Support / Online Security cuts churn by ~25 pts.
4	Fix fiber experience	Investigate pricing & reliability; fiber churn (42%) is the largest revenue leak.
5	Migrate off electronic check	Incentivize auto-pay enrollment — drops churn from 45% to ~15%.
6	Watch high-ARPU customers	Customers > \$80/mo churn disproportionately; proactive CSM outreach.
